DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-18 are drawn to a price and risk evaluation system and a corresponding recording medium, classified in 705, subclass 36R.

Invention II: Claims 19-24 and 32 are drawn to a dealing system comprising implied volatility computation engine, a Boltzmann model computation engine, a filter and a terminal, classified in 705, subclass 37.

Invention III: Claims 25-31 and 33-36 are drawn to a dealing system comprising theoretical price interpolation unit, an interface, a theoretical price and parameter computation engine, classified in 705, subclass 37.

2. The inventions I - III are distinct, each from the other because of the following reasons:

Inventions I-III are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable.

Inventions I, II and III are directed to related systems. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have different mode of operation requiring different field of search. Furthermore, the inventions as claimed do not

encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. A telephone call attempt was made on September 6, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
